

FAIJAN ANWAR

Full Stack Developer | MERN Stack & Web3 Developer

Jaipur, Rajasthan, India | +91 70147 02263 | hello@faijan.in | Portfolio: faijan.in | LinkedIn: linkedin.com/in/faijan-anwar | GitHub: github.com/faijananwar

PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of freelance experience delivering 20+ production-grade web and Web3 applications spanning SaaS platforms, encrypted security systems, and decentralized governance tools. Proficient in React, TypeScript, Node.js, Express.js, PostgreSQL, Supabase, and MongoDB, with hands-on expertise in JWT/AES-GCM security, REST APIs, and CI/CD deployment via Vercel and Render. Pursuing an MCA in Computer Science with strong foundations in DSA, DBMS, and OS. Seeking a full-stack or software engineering role to build scalable, secure, high-performance products.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, C, C++, Java

Frontend: React.js, Next.js, AngularJS, Vite, Tailwind CSS, HTML5, CSS3, Framer Motion

Backend & Databases: Node.js, Express.js, REST APIs, PostgreSQL, MongoDB, Supabase, MySQL

Security: JWT, AES-GCM Encryption, bcrypt, RBAC, RLS Policies, Apigee API Security

Web3 & Tools: Solidity, OpenZeppelin, Smart Contracts, DAO Governance, ERC20, Ethers.js, Git, GitHub, Vercel, Render, Postman, GCP

PROJECTS

DAO Governance System | React, TypeScript, Vite, Tailwind CSS, Solidity, OpenZeppelin

- Engineered a decentralized governance platform implementing token-based voting, proposal creation, treasury management, and timelock-controlled execution.
- Built ERC20 governance smart contracts using OpenZeppelin standards for quorum tracking and on-chain vote delegation, with a responsive React + shadcn/ui interface.
- Deployed a live demo on Vercel with public codebase available on GitHub.

DevBlog Platform | React, TypeScript, Node.js, Express.js, PostgreSQL, Supabase, Zod

- Developed a full-stack blogging platform with role-based authentication, markdown editing, and scalable REST API architecture.
- Implemented Zod schema validation and persistent relational storage using PostgreSQL/Supabase, with modular Express.js routes for multi-role permission control.
- Deployed production build on Vercel with live demo access.

SecureVault — Encrypted Notes Platform | React, Node.js, Express, MongoDB, AES-GCM, Web Crypto API, JWT

- Built an end-to-end encrypted notes application using AES-GCM cryptography, the Web Crypto API, JWT authentication, bcrypt hashing, and secure HTTP-only cookies for defense-in-depth security.
- Designed a Multer-based per-user file upload pipeline and deployed frontend on Vercel with backend API on Render under production configuration.

EXPERIENCE

Full Stack Engineer — Orinson Technologies Private Limited (Remote) | May 2026 – Present

- Collaborate with a cross-functional virtual team to design, build, and optimize full-stack web applications using modern architectures.
- Structure clean frontend interfaces and backend database connections, improving overall codebase modularity.
- Optimize application page load performance and coordinate sprint-based development cycles.

Web Developer — Global IT Providers, Jaipur | May 2026 – Present

- Contribute to end-to-end web development projects with a focus on clean architecture and responsive UI.
- Design modular React components and assist with PostgreSQL/MongoDB database integration and index optimization.
- Ensure application performance and responsiveness under senior developer review.

Freelance Full Stack & Web3 Developer — Independent Contracts | 2024 – Present

- Delivered 20+ production-grade SaaS dashboards, blogging platforms, and Web3 systems for global clients using Next.js, Node.js, and Supabase.
- Authored and audited Solidity smart contracts (OpenZeppelin standards) for DAO governance and token distribution, enforcing JWT authentication and RLS database policies across client projects with a 100% satisfaction rate.

EDUCATION

Master of Computer Applications (MCA), Computer Science — Poornima University, Jaipur | 2025 – 2027

Bachelor's Degree — Maharaja Surajmal Brij University (MSBU) | 2022 – 2025

CERTIFICATIONS

API Security on Google Cloud's Apigee API Platform — Google Cloud | Google Cloud Computing Foundations: Cloud Computing Fundamentals — Google Cloud | Red Hat System Administration I (RH124) — Red Hat

ACHIEVEMENTS

- Delivered 20+ full-stack and Web3 projects as a freelancer with a 100% satisfaction rate, deploying production systems audited to OpenZeppelin standards.
